

I pay money to listen to XM Radio, because its music channels are free of commercials and I can here whatever I want uncut. There is a device that is on all radios and it is called a tuner dial and it allows the users to tune to the station that they want to here. Also these radios come equiped with power buttons to turn them off, when there is somthing that you dont like on. Those buttons allow the user to choice what he or she wants to here and I have the right to choice what I wanna listen to especially when I am paying extra for it! Please let the people decide what they want to here, buy choosing a station not buy you choosing what is on it for them. thank you and God Bless America
